Lane 1: Control Plane
Protocol-as-DSL
Interpret rules
Flow Controller (Deterministic)
Agenda/constraints
Session Manager
Fitness + suggestions
Gate action
Constraints + agenda
Update session state
Lane 2: Runtime Turn Loop + Audit
if high risk
STOP Safety Interrupt
Safety protocol
Blocked / Redirect
[1] User Utterance
[2] RiskMonitor
Preemptive (runs first)
[3] Extractor
[5] Evaluator
[6] Deterministic Gating (Switch)
Allowed
[7] Interviewer
Next Mi-style Question
log
log interrupt
ledger update
append fitness
gate event
Audit & Memory
[4] Evidence Ledger
(Append-only)
Clinical Evidence Chain (CEC)
Global Context Memory
(Deterministic Summary)
Steps (1–7)
1 Receive
2 Monitor risk (interrupt if needed)
3 Extract evidence
4 Ledger update
5 Evaluate fitness
6 Gate
7 Ask + update session
Turn t+1
